

Legal Entity Management

Enable simple oversight and governance of complex organizations.

Streamline Your Corporate Governance

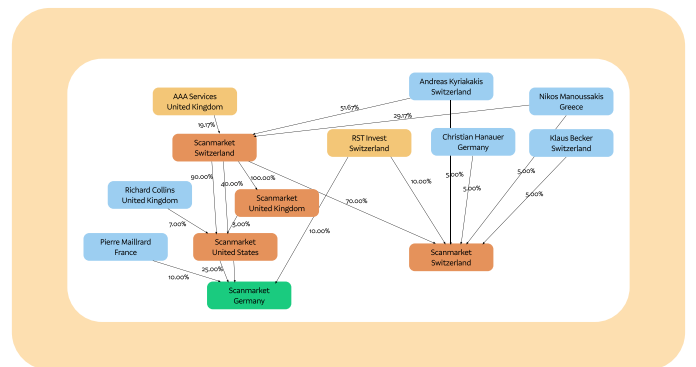

The legalities behind dealing with corporate management, shares, voting rights and stakeholder information mean companies are forced to spend a lot of time and resources on complicated, inefficient, and inaccurate manual processes.

Corporate management teams in large enterprises are under increasing pressure to keep up with regulatory compliance, administrative maintenance, and transmission of digital corporate data. Our legal entity management software removes the burden through an easy-to-use online software application.

Straightforward Corporate Housekeeping

Scanmarket's Legal Entity Management software helps you manage your regulatory and statutory responsibilities as an organization and maintain control via your central repository for corporate secretary records.

Having a shared repository enables you to keep track of all details relating to your corporate ownership, directors, and key management teams within the various entities that make up your corporation.

Legal Entity Management Across the Organization

- Transparent overview of Holcim legal structures and ownership.
- Best-in-class support from Scanmarket (previously Symfact) during implementation and post-implementation.
- Very user-friendly tool & powerful access controls.

Holcim Group
