

Supply Base Management

Reduce risk of non-compliance by ensuring supplier information is current with automated supplier onboarding.

Centralize All Supplier Data and Minimize Administration

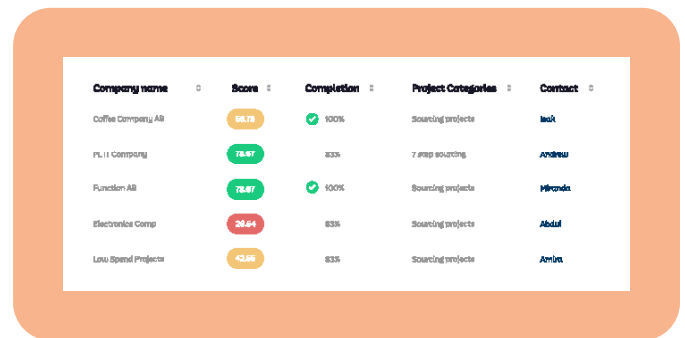

Scanmarket Supply Base Management provides visibility into customizable supplier and contact information, communication, past activities, sustainability and more.

Valuable time is saved through a controlled, automated supplier onboarding and approval process whilst enabling scoring parameters of supplier information.

Real-time notifications help mitigate against the risk of non-compliance within the supply chain by ensuring that supplier information is current and up to date.

Collaborate with Suppliers

Keeping supplier data up to date is of equal interest to you and your suppliers, so why not simply make it a collaborative effort? Just centralize all supplier data and ask your suppliers to keep their contact records, accreditations, and certifications up to date, benefitting stakeholders in both camps. Scanmarket's Supplier Risk & Performance Management Software is equipped to distribute questionnaires that can be linked to sourcing events.

Company name	Score	Completion	Project Categories	Contact
Coffee Company AB	80.18	100%	Sourcing projects	Jack
PL 11 Company	78.87	83%	7 step sourcing	Andrew
Function AB	78.87	100%	Sourcing projects	Miranda
Electronics Comp	39.64	83%	Sourcing projects	Abdul
Low Spend Projects	43.95	83%	Sourcing projects	Amin

Supplier-driven Compliance

Save time by automating and streamlining maintenance and compliance of supplier certification, documentation and scoring, moving responsibility for all updates and verifications to suppliers.

Scanmarket has provided excellent support, experience and expertise.

Scanmarket Supply Base Management Efficiencies

- **65%** reduction in supplier management resources/costs.
- **Maximize** compliance.
- **Minimize** risk.

Simplify Supplier Relationships

Gain deep visibility of your supplier base

Easily access, report on, and interrogate all supplier data and documents from one central repository, with configurable dashboards and numerous supplier segmentation options.

Automate and streamline supplier management processes

Remove 65% of the manual workload through automated category-specific supplier onboarding workflows, autoscoring, self-managed supplier profiles and bulk segmented messaging, reminders, and questionnaire/assessment assignment.

Safeguard flow of supply

React to supply chain events or risks before it's too late - by quickly issuing custom questionnaires to your supply base, interrogating the data, and making data-driven decisions.

Protect your reputation and CSR profile

Enforce and track supplier compliance from anti-slavery and child labor to full environmental, CSR, sustainability, and corporate governance.

Exchange of data

Use our standard APIs and integration points to easily push data to and accept data from other solutions, including your ERP and other 3rd party systems for a consolidated view of your supplier ecosystem.

Strategic supplier portfolio

Update your supplier portfolio and control performance through strategic use of supplier surveys, scorecards, KPIs and candidate information.
