

Policy Management

Store and manage all your policies and procedures using one centralized software solution.

Simplify Your Policy-making Process

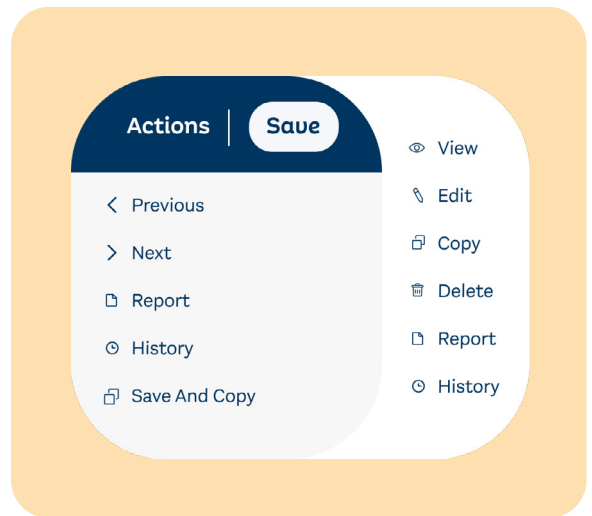

Policy control challenges have grown exponentially with the recent proliferation of documents, collaboration software, file shares and web sites. Organizations may have them scattered across dozens of disparate sites and departments with no definitive understanding of which policies exist and whether they are enforced.

Effective Policy Creation & Management

Scanmarket's Policy Management software provides a consistent process for management of corporate policies, exceptions, and regulations.

The software enables organizations to author and maintain a library of corporate policies in a consistent and formal manner. Approved policies can be distributed to employees and external parties as appropriate.

It allows you to communicate policies across your enterprise, monitor and track acceptance, assess compliance and manage exceptions.

Simply Effective Management of Sport & Event Agreements

- Globally standardized review processes for all relevant obligations.
- Post-execution review process for terms and conditions.
- Automated tracking of non-compliant or overdue obligations.

Scanmarket Policy Management Efficiencies

- Single repository for all policies with strict, verifiable version control of policy library.
- Audit log of policy delivery and employee acknowledgement.
- Formal new policy request form, and consistent creation, approval & delivery of policies.

Policy Management Starts with Visibility and Ends with Control

Central repository

Streamline your policy-making process by storing all policies and associated documents in one easily accessible repository. Enable strict access control over data and documents, verifiable version control of the policy library, and utilize a formal request form for new policies.

Notifications & event triggers

Never miss the end of a policy or a renewal date with our configurable event triggers and notifications, enabling advanced system notifications for policy review, acceptance, and policy expiry dates.

Integrations

Integrate seamlessly into all major ERP and CRM systems linking policies to customers and suppliers.

Access anywhere

Our web-based policy management software is accessible 24 hours/day worldwide.

Easy reporting & analysis

Receive great insights into your policy management with our comprehensive reporting tools and dashboards. Capture and display detailed data on the effectiveness of policy deployment, using your audit log of policy delivery & employee acknowledgment and confirmations.

Ongoing support

We pride ourselves on our after-sales support where you will have access to our Quick Call support 24/5 and a dedicated Customer Success Manager to help you increase adoption and usage of the software.

500+ Customers Chose Scanmarket!
